FLEXTYPE

Founder and Lead Developer | Mar 2018 - Present

flextype.org | github.com/flextype/flextype

Flextype is an open-source Hybrid Content Management System with the freedom of a headless CMS and with the full functionality of a traditional CMS. The underlying architecture of Flextype is built using well established and best-in-class technologies.

Key Features:

- Super fast content management system because of its simple elegance architecture and built-in smart cache.
- Simple but powerful API's to achieve simplicity and flexibility.
- REST API with compact JSON payloads gives you full programmatic control over your content management system.
- The flat-file nature of Flextype lets you define unlimited custom fields for any of your entries.
- File-based content management system, you can version control all content with GIT or any other Version Control System.

MONSTRA

Founder and Lead Developer | Jun 2010 - Apr 2016

monstra.org | github.com/monstra-cms/monstra

Lightweight XML-Based Content Management System.

SOFTPEDIA PICK AWARD, SOFTPEDIA SCRIPT OF THE DAY AWARD.
